Connector Type:	N2EBFS50-EZ141B/94	Inner Conductor Contact:	Plug-in
Suitable Cable:	RG402, .141 Semi-Rigid and Semi-Flex Cables RG402, .141 Flexible Cables	Outer Conductor Contact:	Soldered
Parts List of Connector: 			
Assembly Steps:			
Picture	Process	Attention/Check	Tools Required
For Semi-Rigid and Semi-Flex Cables: 	For Semi-Rigid and Semi-Form cable : Trim cable according to drawing. Chamfer center contact. Dimension 15 mm applies to the FEP jacket cables.	Strip the cable end perpendicular to its axis. Do not damage center contact.	Blades Trim tools
For Flexible Cables: 	For Flexible Cable: Remove the cable jacket according to the picture and put the braid into liquid tin. Remove cable dielectric according to the drawing. Chamfer center contact.	Do not damage center contact, dielectric or braid. The liquid tin has to cover a length of 15 mm. If the cable does not fit into the cable entry, utilize a flat-nose plier to adjust the outer contact.	Blades Solder pot Flat-nose plier
	Slide connector body "A" over the cable. Solder connector body "A" to the cable (see drawing).	Avoid excessive heat. Immediately use alcohol to wipe the soldered area to reduce joint temperature and remove residuals.	Solder iron
